

ALPHABIMMER GROUP

Alphabimmer's Smart Package Manager

(SPM Ultra v3.1.2)

**Easy Extraction and Package Manager
For INPA / ISTA+ / ISTA-P**

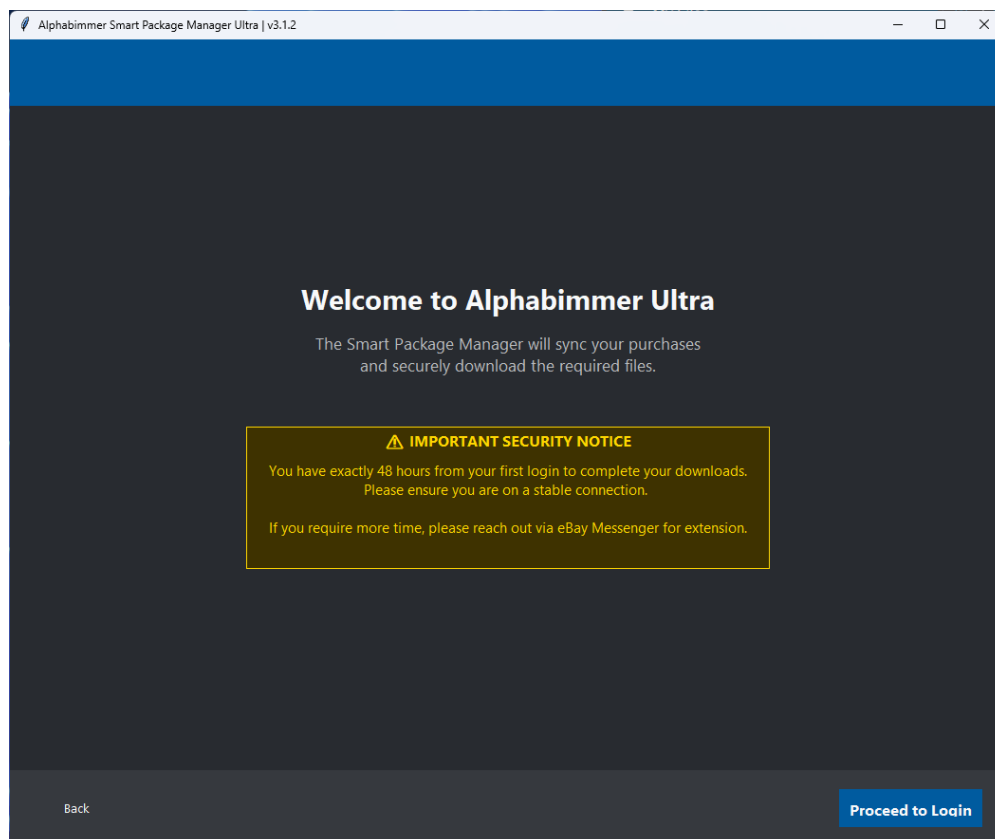

Version 1.2

Last Published 14/04/2026

To make your setup as smooth as possible, we've developed the **Alphabimmer Smart Package Manager Ultra v3.1.2**. If you aren't comfortable downloading multiple and large quantity of files and extracting, organizing, or moving multi-part files and you simply want to save time and avoid confusion—this tool does the heavy lifting for you!

Next Steps: Along with your purchased files (INPA, ISTA+, ISTA-P, Toolkits, and PDF guides), please make sure to download **Alphabimmer_PackageManagerUltra_v3.1.2.exe** to help automate your installation prep.

1. Download and Run **Alphabimmer_PackageManagerUltra_v3.1.2.exe**
2. Click Proceed to Login:

3. Enter the user credentials provided to you on eBay Messenger and click “Authenticate and Sync”:

Already have your files downloaded and extracted?
[Bypass Login](#)

[Back](#)

4. From the following Available Cloud Packages window, select the ones applicable to your order / purchase:
5. Click Confirm and Proceed:

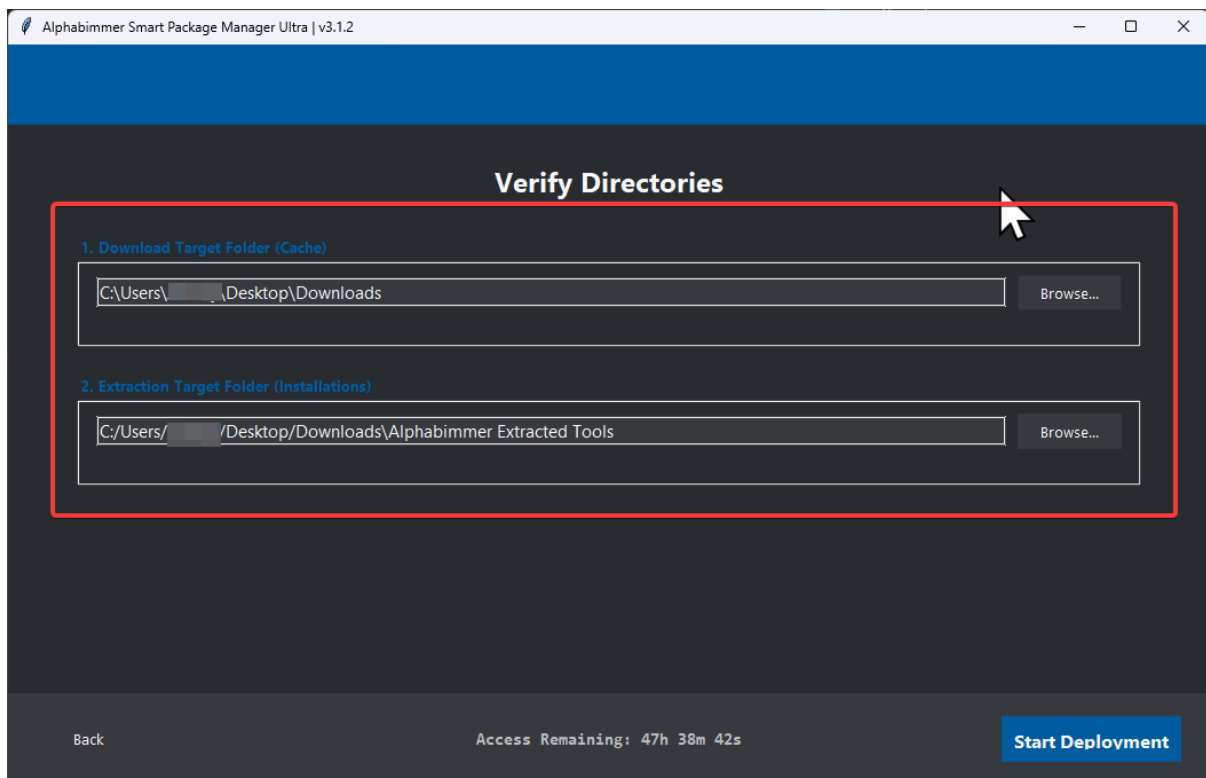

6. The below window is where your files will be downloaded and where you would like the processed / extracted files to be placed:

Noting again, that this is NOT INSTALLING the Applications or Tools, we are simply downloading and extracting them so they are ready to proceed with the installation:

(1) would be where the files will be downloaded to: if you want to change the default Download location:

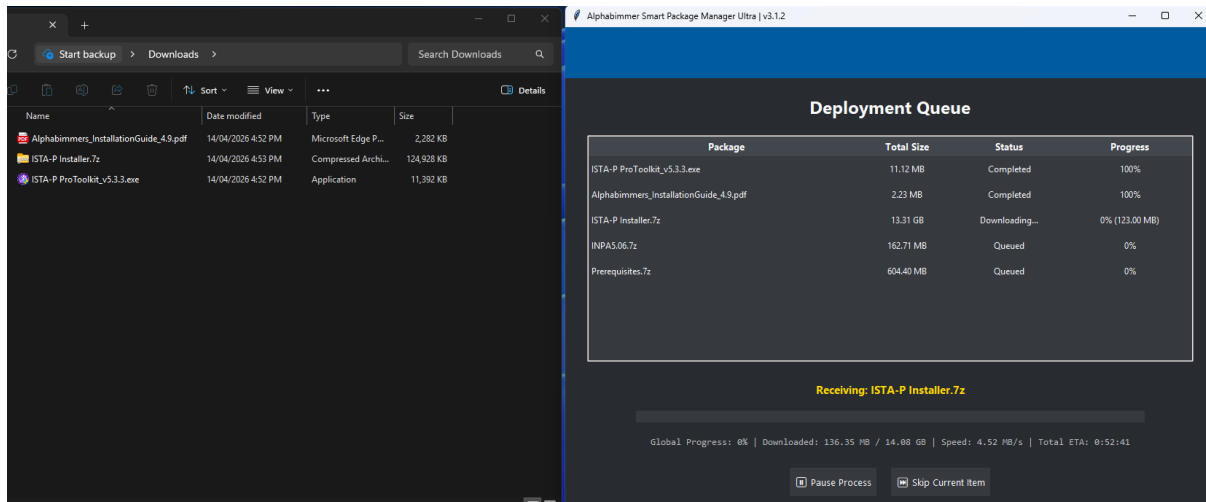

(2) would be the Target location of where the files should be extracted to:

Note; if you have sufficient disk space on your C:\ drive, leave it as default and click “start deployment”

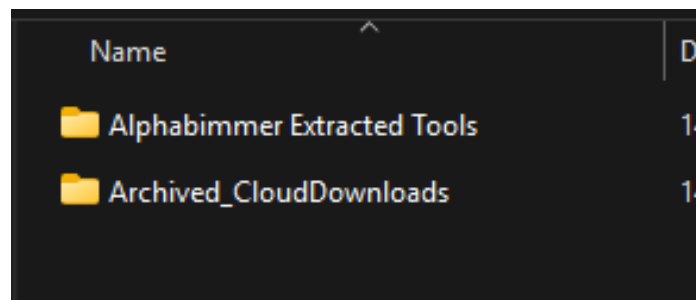

- The Package Manager will begin Downloading the files you have selected according to your eBay order and then process the files by extracting them.

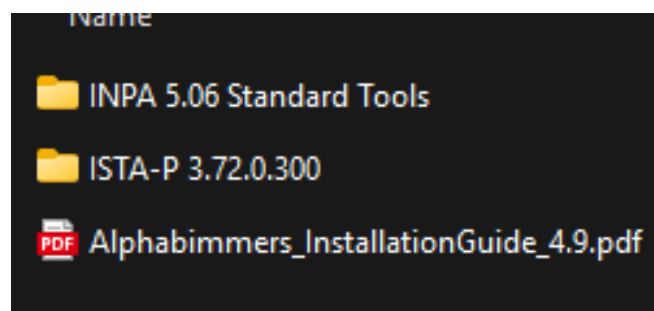

The files will begin downloading as per normal; any files that are .7z zipped will be extracted and the structure will change and sort automatically into two folders (refer step 9)

- Allow up-to ~15 minutes for all files to finish extracting:
- You will now notice that the files have been sorted into two folders:

- You may now proceed with locating the **Installation manual** in the **Alphabimmer Extracted Tools Folder** and start the installation in ideally the following sequence: INPA > ISTA+ > ISTA-P (depending on what you've been provided or purchased).

11. Alternatively, you can continue with the Package Manager to commence the installation of the purchased Applications by following the numbered steps.
